

## CLAIMS

I claim:

1. A paint touch-up kit, comprising:
  - a carrier having a handle, the bottom defining depressions, having a supply area and having a divider;
  - at least one container having a bottle, a cap, paint and a label, the cap having a flip top and a lip, the at least one bottle being positioned cap down friction fit inside one of the depressions such that the depression precludes the container from tipping over during storage and yet allows removal for use;
  - and
  - supplies selected from the group consisting of foam brushes, cotton swabbed brushes, sandpaper, paper towel, funnel, spackling, roller brush and roller tray, the supplies positioned in the supply area of the carrier.
  
2. A paint touch-up kit, comprising:
  - a carrier having a bottom and a handle, the bottom defining depressions, having a supply area and having a divider; and
  - at least one container having a bottle, a cap, paint and a label, the cap having a flip top and a lip, the at least one bottle being positioned cap down friction fit inside one of the depressions such that the depression precludes the container from tipping over during storage and yet allows removal for use.

3. The device of claim 2 further comprising supplies positioned in the supply area of the carrier.
4. The device of claim 3 wherein the supplies include at least one member selected from the group consisting of foam brushes, cotton swabbed brushes, sandpaper, paper towel, funnel, spackling, roller brush and roller tray, the supplies positioned in the supply area of the carrier.
5. The device of claim 2 wherein there are a plurality of depressions and a plurality of corresponding containers.
6. The device of claim 2 wherein the cap is threadedly secured to the bottle and the flip top snap fits to a closed position.
7. The device of claim 2 wherein the bottle is clear.
8. The device of claim 2 wherein each container is approximately two inches in diameter and six inches tall.
9. The device of claim 2 wherein each depression is approximately three-quarters of an inch deep.

10. The device of claim 2 wherein the container has a front end and a back end, the depressions being formed adjacent the front end and back end of the carrier with the supply area positioned therebetween.
11. The device of claim 2 wherein the divider projects at least two inches above the bottom.
12. The device of claim 2 wherein the carrier has a right side and a left side projecting at least three inches above the bottom.
13. A method of touching up paint, comprising:
  - preparing the surface to be painted;
  - selecting a brush from a carrier;
  - removing a container from the carrier by lifting the cap end of the container out of a depression defined in the carrier;
  - opening the flip top of the cap to access paint;
  - applying the paint; and
  - storing the container and paint contained therein, cap-side down.
14. The method of claim 13 wherein the surface is prepared using at least one member selected from the group consisting of sandpaper, paper towel, and spackling.

15. The method of claim 13 wherein at least one brush is selected from the group consisting of a foam brush, a cotton swabbed brush and a roller brush.
16. The method of claim 13 further comprising the step of placing paint in the container using a funnel.
17. The method of claim 13 further comprising the steps of:  
maintaining paint of each color used within a home in a separate container;  
storing each container in a depression defined in a bottom of the carrier.
18. The method of claim 17 further comprising the step of:  
labeling each container with the color of the paint, date each room was painted  
with the paint color and identification of each room painted with the color.
